Strength in depth
WELCOME TO AQUATIC

Aquatic, an Acteon company, is the market leading independent operator of carousels, modular drive systems and tensioner solutions for the global oil and gas, telecommunications and energy industries.

With more than 40 years’ experience in onshore and offshore installations, transpooling, recovery and decommissioning works, we work with our customers adapting our equipment and solutions to meet their needs.

WHAT IS STRENGTH IN DEPTH?
IT’S 40 YEARS OF ACCUMULATED EXPERTISE
IT’S WORKING TOGETHER TO ACHIEVE SMARTER SOLUTIONS
IT’S A COMMITMENT TO BEING THE BEST
SURF KNOWLEDGE

We know the depth of our SURF knowledge. We work closely with our customers to gain an in-depth understanding of their business and the projects they have won. Combined with a constantly progressive outlook, this allows us to see the challenges they may face and quickly develop efficient, effective answers.

Our SURF knowledge is central to our business; with over 40 years’ experience in this industry we know how to handle risers, umbilicals and flowlines. We understand bend restrictions, tolerances and how to link subsea structures to floating systems or shore operation centres.

From our strategic thinkers to our experienced offshore teams, our logistics planners to our skilled engineers, we are all committed to delivering a collaborative service.

It’s our progressive outlook that causes us to continuously seek new, smarter ways of working and set new standards for both ourselves and our sector.

It’s this knowledge that gives us strength in depth.

THE GLOBAL PARTNERS FOR COMPLETE FLEX-LAY SOLUTIONS...

Aquatic deployed the world’s largest spool-type modular carousel to install 35km of umbilical to ensure electrical control capability, between a central processing facility and the field.

PROJECT MANAGEMENT

We know the strength of our dependability. Aquatic is utterly reliable which means you can trust us to get the job done, whatever it takes. With expert project management capabilities, an extensive range of equipment and regional expertise, Aquatic people work together to deliver what our customers need, where they need it.

This isn’t just a claim we make. Our actions are measurable through reporting mechanisms that show our customers exactly what has been achieved, from the Americas to Asia Pacific, and all points in between including the North Sea, the Middle East and Africa.

It’s this dependability that gives us strength in depth.
OFFSHORE EXPERTISE

We know the depth of our offshore expertise. We are passionate about providing our customers with superior service quality.

It always involves providing a comprehensive solution that includes a team of people to operate and maintain the equipment throughout the project.

Our offshore teams are trained, guided and challenged to maintain operational efficiency in demanding marine installation projects. Their input invariably improves our customers’ project timings and financial results.

It’s the aptitude of our offshore teams that’s key to our strength in depth.

Aquatic can install, replace and recover semi-rigid products such as:
- coiled tubing
- flowlines
- flying leads
- mooring lines
- power cables
- production flowlines
- production gas lift and injection risers
- reelable steel pipe
- telecommunication cables
- umbilicals
- water pipes
- wire rope products

LOGISTICS

We know the strength of our logistics planning. Coordinating people and equipment and getting them by road, rail, sea or air to where they need to be, when they need to be, this is one of our invisible strengths.

Keeping pace with personal, organisational and economic events makes logistics planning interesting and challenging; and only by having a group of approved national and international freight and travel partners can we ensure we achieve a unified approach.

Our commitment to logistics planning gives us strength in depth.
ENGINEERING

We know the depth of our engineering expertise. Our 40 years of accumulated knowledge and expertise is sector-leading. Our customers know we’ll work closely with them to understand their operations and help them achieve the optimal outcome. Sometimes this even involves innovating and engineering a new piece of equipment that meets their project need.

It’s this high level of expertise that makes customers seek us out for their most challenging projects and come back to us time and again.

It’s this engineering expertise that gives us strength in depth.

GLOBAL REPUTATION

With teams in Houston, Aberdeen, Peterhead and Singapore, and equipment strategically located worldwide, we meet customers locally and understand their own particular challenges to bring a project in on time.

It’s our inimitable reputation that gives us strength in depth.
We know the strength of our safety record. With forty years’ experience behind us, we know the inherent risks of our sector and are serious about safety. We never cut corners or take unnecessary risks. We’re diligent about safeguarding people and projects onshore and offshore, throughout our global operations and on our customers’ vessels. Our OHSAS 18001, ISO 9001 and ISO 14001 certifications reflect this, as does our unimpeachable track record since March 2012, of over 1,000 consecutive days without lost time incident. By continuing to expertly manage and mitigate risk, we can keep people safe and projects on track.

It’s this unquestionable dedication to safety that’s our strength in depth.
TO COMPLEMENT OUR IN-HOUSE PORTFOLIO WE ARE ABLE TO DRAW ON THE SKILLS, EXPERTISE AND
FINANCIAL STRENGTH OF THE COLLECTIVE RESOURCES WITHIN THE GLOBAL ACTEON GROUP. LEARN MORE
